

Cycle Enclosure

Maximum Portable Protection

Protect Your Machine from Inclement Weather & Sun Damage

MDM Products Cycle Enclosures are designed for motorcycles, bicycles, or just about anything on two wheels. The unit is easily transported and set up almost anywhere. The unique frame is comprised of both color-coded metal and fiberglass poles. The cover is a single piece component with no snaps, zippers, or other fasteners required. Allows storage of vehicle with hot engine or exhausts as the frame supports the cover in a symmetrical shape totally off the vehicle.

All fabric components feature commercially sewn construction for longevity. Corners are gusseted for years of use. The cover design provides for run-off of rain, or melting snow, to avoid water getting in through the perimeter of the cover. Each unit comes equipped with air vents on each side to prevent condensation during storage. Storage/Travel Bag included.

Exclusive Features

- **Portable Design for Travel or Home Use**
- **Resists Sun, Rain, Hail, Wind**
- **Carry Bag Included for Travel**
